

PROBLEMS IDENTIFIED BY TI GEORGIA'S COMMITTEES OF CONCERNED CITIZENS IN SAMTSKHE-JAVAKHETI

Members of TI Georgia's Committees of Concerned Citizens have identified more than 40 infrastructural problems/needs in Akhaltsikhe and Adigeni. We hope that the local self-government bodies will take account of the identified needs of citizens in the draft budgets of 2021 as much as possible.

Active citizens living in Adigeni have joined our Committees of Concerned Citizens for the first time this year.

In a big part of the villages, the problems include the condition of internal neighborhood roads and drainage canals; the poor condition of outdoor lighting and drinking/irrigation water supply systems; falling of stones from the rock massif on the road connecting with Akhaltsikhe; etc. And in parts of the cities, zebra crossings and sidewalks need to be renewed, or, on some locations, arranged; municipal transport needs to be allocated in several neighborhoods of the cities; and bus stops need to be installed on many locations.

The Committees of Concerned Citizens are informal associations of citizens created through the initiative of TI Georgia which aim to resolve problems in municipalities with direct involvement of the local population and with the mediation provided by our organization.

The novelty in the work of the Committees of Samtskhe-Javakheti this year was that we met with the population of several villages of the municipalities of Adigeni and Akhaltsikhe with the aim of studying the problems there and advocating them.

And in 2019, on the initiative of our Committees, we applied to the Akhaltsikhe City Hall with a request to resolve more than 30 problems in 13 settlements of the municipality. The City Hall decided to address 13 of the problems this year.

TI Georgia is going to present to the public this year's report on the activities of the Committees of Concerned Citizens in Samtskhe-Javakheti in the nearest future. At this point, it is important that the local self-government bodies of Akhaltsikhe and Adigeni take account of the resolution of the problems identified by our Committees as much as possible when they consider the next year's budgets. With this purpose, below we give a list of problems named by citizens in the aforementioned two municipalities:
